

...instruction reading, provide a ~250 word reflection on your day of the module, and discuss why you're interested in this module and what you hope to take away from it.

## Upload your photo to your module GitHub repository

- » Upload your photo of the device created in the **Button** example, to the `/docs/images/` folder of your module repository.
- » Navigate to the `/docs/images` folder and click the **upload files** button.

- » Select the file and commit changes (directly to the `master` branch).

## Insert your uploaded photo into the markdown file

- » Edit your `index.md` file to insert the image beneath your day 1 reflection text. When inserting the file, refer to its location in the `/images` folder. For example, if your
